WHO WE ARE

About the company

Artificial Intelligence Systems (AIS) is a technology & system integrator, established to be one of the fastest growing firms in the market of renewable energy, automation, low current systems, network infrastructure, telecommunications, fleet management and software integration.

Vision

To be the leading system integrator in the MENA region, creating and applying innovative technology solutions that improve business results of our customers and improve society in general.

Mission

To provide innovative and integrated solutions to MENA business clients, delivering their expectations through highly qualified individuals, credible experience, and top quality services.

OUR EXPERTISE

Our services

Six integrated service lines under one roof, from design and supply to installation, commissioning and maintenance.

Low Current Systems

Smart building & security systems: CCTV, access control, fire alarm, BMS, sound and more.

IT Solutions & Hardware

Networks, Wi-Fi, data centers, servers, backup and power protection.

Solar Systems

On-grid, off-grid and hybrid solar power, pumps, lighting and heating.

Electrical Systems

Design, installation and maintenance for generation, protection and distribution.

Fleet Management

GPS tracking, in-vehicle video, AI driver monitoring and fuel control from one dashboard.

Software Integration

One platform that unifies your security, building and business systems.

SERVICE 01

Low Current Systems

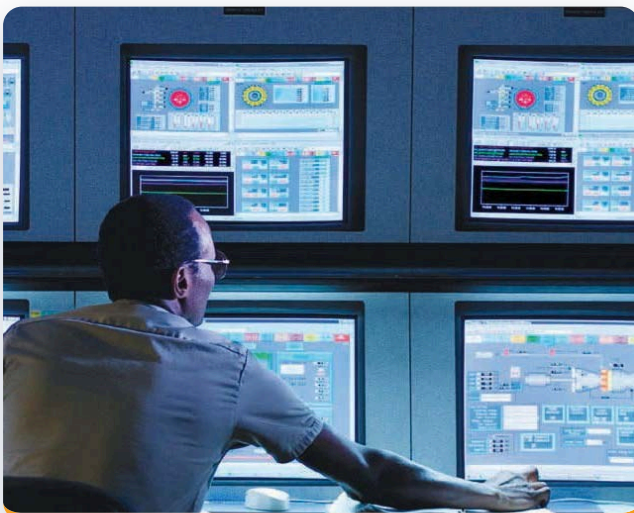

Offering full engineering solutions, we design, install, upgrade and maintain all types of low current systems.

Smart systems

- ✓ Smart and system automation
- ✓ Lighting control
- ✓ TV systems
- ✓ Networks and IP telephony
- ✓ Fire alarm systems
- ✓ Sound systems
- ✓ Building Management Systems (BMS)

Security systems

- ✓ CCTV and surveillance
- ✓ Access control systems
- ✓ Intrusion systems
- ✓ Gates and barriers

SERVICE 02

IT Solutions & Hardware

02

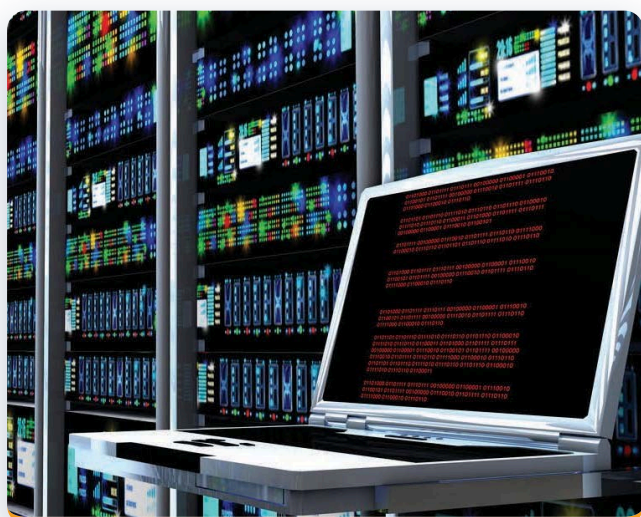

We plan, design, install and supply most IT infrastructure systems and networks, aiming to provide the complete range of IT services required by any business.

IT infrastructure

- ✓ IT infrastructure consulting
- ✓ Wireless communications
- ✓ Wi-Fi solutions
- ✓ Wired Ethernet LAN
- ✓ Power backup and UPS
- ✓ VoIP

Computing systems

- ✓ Backup systems
- ✓ Data centers and servers
- ✓ Computing services

SERVICE 03

Solar Systems

Designing and installing a wide range of renewable energy power options for domestic, institutional and corporate clients. We provide reliable and cost-effective power solutions.

Applications

- ✓ Off-grid system
- ✓ On-grid system
- ✓ Hybrid system
- ✓ Solar lighting system
- ✓ Solar water pumps
- ✓ Solar heating

SERVICE 04

Electrical Systems

04

A competitive and comprehensive range of electrical products and services in the fields of generation, protection, distribution and transmission.

Design

- ✓ Design solutions
- ✓ Energy saving solution
- ✓ AutoCAD drafting and as-built

Install

- ✓ Electrical works
- ✓ Automation and controls
- ✓ Testing, commissioning and handover

Maintain

- ✓ 24/7 emergency response
- ✓ Facility management
- ✓ Programmed maintenance

SERVICE 05

Fleet Management

Full visibility and control over every vehicle. We combine GPS tracking, in-vehicle video and telematics into one platform that cuts fuel cost, improves driver safety and keeps your fleet on schedule.

Tracking & telematics

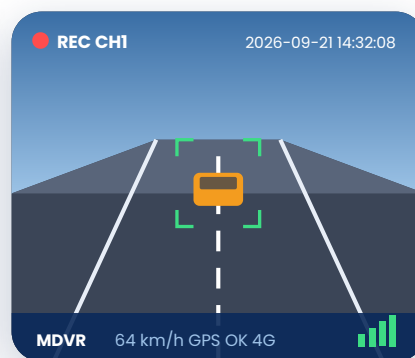

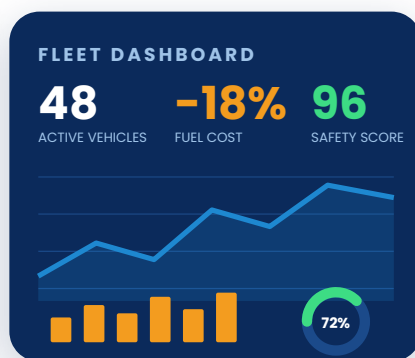

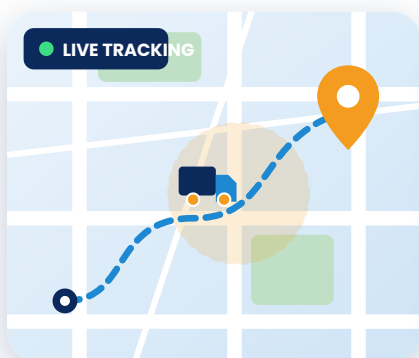

- ✓ Real-time GPS vehicle tracking
- ✓ Geofencing, route and trip history
- ✓ Fuel level and consumption monitoring
- ✓ Engine, speed and idle-time alerts

Video & safety

- ✓ Mobile DVR / MDVR in-vehicle video
- ✓ Driver behavior and fatigue monitoring
- ✓ Event-based video evidence
- ✓ Panic button and incident alerts

Management

- ✓ Maintenance scheduling and reminders
- ✓ Driver and asset management
- ✓ Custom dashboards and reports
- ✓ Integration with ERP and dispatch systems

Key capabilities

GPS Tracking

SERVICE 05 · AI

AI Driver Monitoring

With Howen AI in-vehicle cameras, fleet managers detect risky driving as it happens and coach drivers with real video evidence, reducing accidents, insurance cost and downtime.

Eye closure

Yawning

Distraction

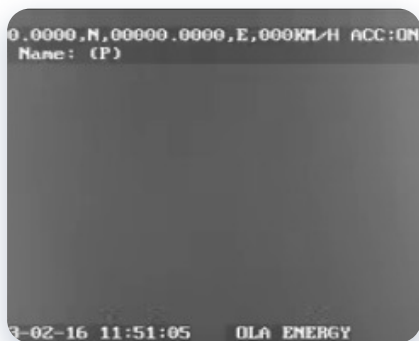

Phone call

Driver identification

Smoking

Camera cover

AI alerts in real time

Every event is recorded with GPS and time, and sent to the control center to coach drivers.

SERVICE 06

Software Integration

We connect separate systems into one intelligent platform, so operators see everything in a single screen and your business data flows automatically between systems.

Systems integration

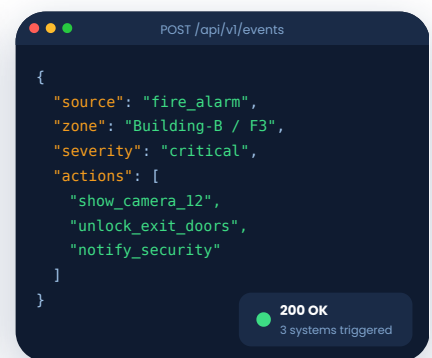

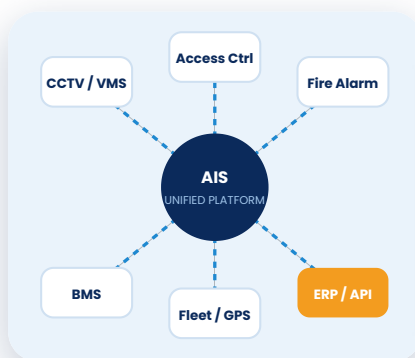

- ✓ CCTV / VMS, access control and intrusion
- ✓ Fire alarm, BMS and building automation
- ✓ Sound, lighting and smart-building control
- ✓ Unified command-and-control dashboards

Software & data

- ✓ Custom software and web applications
- ✓ API and third-party system integration
- ✓ Database, ERP and reporting connectivity
- ✓ Cloud and on-premise deployment

Protocols & standards

- ✓ ONVIF, BACnet, Modbus, OPC
- ✓ SNMP, REST API and SDK integration
- ✓ Cybersecurity-aware architecture
- ✓ Testing, training and long-term support

TECHNOLOGY ALLIANCES

Our partners

We work with the world's leading technology manufacturers to deliver certified, reliable and future-proof solutions.

TRUSTED BY

Our clients

Organizations across Egypt and the region rely on AIS to design, deliver and maintain their systems.
